What's New In?

The new Markup Assistant is a powerful tool for viewing and editing your imported markups. You can quickly correct, rearrange, and compare with your original markups. You can now share these markups online and manage and view them in different ways, both online and in AutoCAD. (video: 1:27 min.) You can now import highly detailed and complex 3D objects from third-party 3D CAD models. These CAD models can be shared directly to AutoCAD by using the brand-new Import CAD Markup tool. You can now incorporate any type of imported markups into your drawings, such as 2D or 3D models. You can import multiple CAD models into a single file, using the new Multiple CAD Model feature. You can also easily import multiple AEC (Architectural, Engineering, and Construction) drawings to a single file, and align them easily. You can now import live data (such as address and telephone numbers) from live maps, such as Google Maps, in Autodesk 360. You can quickly load map data into your current drawing or create new drawing documents with this data. You can set the shape of the corner markers (corners, angles, and so on) and the color of the corner markers when you import the data. You can easily and intuitively align objects, including vertices, lines, polygons, and so on, to facilitate highly accurate and precise alignments. You can add a new perspective to a document, to quickly explore the 3D space of a CAD model. You can now import the latest version of free, open-source AutoCAD extensions from the Internet Archive. For example, you can import extensions that contain features for modeling an entire house or object you may need to create, such as rooms, doors, and stairs. See the complete list of the 2018 Update 1 features here. Shape Fill Tools: You can automatically fill polygon, rectangles, and line drawings with shapes. You can use the Simple Fill tool to automatically fill shapes inside drawings or the Quick Fill tool to fill a selection or a rectangle. The Quick Fill tool is especially helpful when you need to create exact repeating patterns. If a sketch or line is selected, you can now fill it with a shape of your choice. You can use the 3D Bounding Box tool to quickly create the
