Autodesk, the developer of AutoCAD, was originally a small software company that developed and sold hardware for small computers, as well as software for them. In 1969, Autodesk began producing an in-house CAD program that was used by the architectural, engineering and construction businesses to design and create plans. In 1982, Autodesk was purchased by a team of investors, including Stephen Madden, Peter Blake, and Ray Lane, who wanted to create an in-house design and drafting program that would be sold to the broader architectural and engineering markets.

Autodesk sold the software to a group of customers, many of whom were members of the Massachusetts Institute of Technology, who in turn taught it to their students. AutoCAD was originally designed to be compatible with the MIT CAD program MIT Lincoln Lab. The MIT students, while they were using MIT Lincoln Lab, were also using the much more powerful and expensive programs on MIT's mainframe computers. Additionally, the MIT students were using the general purpose CAD programs to design and create parts for their mechanical engineering projects. Autodesk decided to develop a different CAD system for the non-specialist industry market. AutoCAD's first release, 1.0, was in late 1982. AutoCAD also supports rendering with MNG or PDF. Some users of AutoCAD choose to use Microsoft Excel as a drawing manager because of its GUI-centric design, and its ease of use. AutoCAD for the Web AutoCAD LT, AutoCAD Standard, and AutoCAD LT SP2 are web-based applications and available as a web browser plug-in. Users may create drawings using the AutoCAD web app, save them as images, or email them to other users as a web-page. In this way drawings may be distributed as a published document with hyperlinks to the AutoCAD data underlying the drawings. These web apps are integrated with the Windows 8 app platform. AutoCAD LT for Windows is available as a free version and AutoCAD LT for Mac was announced in July 2011. AutoCAD LT for the web and Mobile versions are also available. AutoCAD LT on the web is also integrated with the Windows 8 app platform. AutoCAD LT SP2 for the web was released as a free version, in November 2014. The web-based version was offered free of charge for users who were attending professional technical events and creating drawings to be shared with those attending. This announcement followed a requirement from the U.S. government under the General Services Administration (GSA) standard. AutoCAD LT SP2 is the latest release of AutoCAD LT. AutoCAD LT Standard is for larger businesses and is available for \$5,000 per year or \$40,000 per year with a perpetual license.
