about Propeller 5.1 Propeller is a web-based calendar for multiple users that is designed to be as simple to use as possible. But powerful and sophisticated behind it. It's design and philosophy is very close to the KDE desktop environment. Which is fine, because KDE is very close to the MacOSX desktop environment. Propeller is a simple tool. You can design your calendar online and on your computer desktop with a few clicks. What we did, is to make it very easy for you to get a result that is both simple and powerful. Our calendar can help you share work

and share life with others. So we did not change the way it should be. We took the existing KDE-like structure and designed a new webcalendar from that. It's easy to use, and can be used from all the major platforms (Windows, Linux, OSX and more). It's perfectly usable for personal use. But even for your company, the possibilities are endless. You can share your calendar with your clients. Or you can make your personal calendar to share with your team. It's very easy to add new users and
