How to Run / Open a Folder Without Installing a Program? See the details to figure out how to do this. In order to run a folder, you need to open it from its installed program. If the folder is installed, this section can help you figure out how to open it. The only way to run a folder without installing it is to manually access the folder using the File Explorer, the browser etc. First, you need to open the folder in one of the following ways:
C:\Users\YOUR_USER_NAME\AppData\Local\Pinoy_Software\Pinoy_Software1 In the example above, the Pinoy_Software folder that was created in your profile folder. Second, find the folder that you want to access in the location we described above and access it by simply typing the location in the File Explorer. You might also access it by clicking on Start, then clicking on Run. If the folder is not installed and you try to open it, you will be asked to install it. If you agree and press "Install". The folder will be installed in the following folder: C:\Users\YOUR_USER_NAME\AppData\Local\Pinoy_Software\Pinoy_Software1 In the example above, the Pinoy_Software folder that was created in your profile folder. Although the installation folder is in the Local folder, you may open it anywhere you wish on your system. If you don't wish to install the folder, click "Uninstall". Note: The folder needs to be reinstalled in order to run it. If you want to add a folder to your Pinoy_Software folder you will need to log into your Pinoy_Software folder using File Explorer, the browser, etc. You can open the folder in the following ways: [C]\Users\YOUR_USER_NAME\AppData\Local\Pinoy_Software\Pinoy_Software1 In the example above, the Pinoy_Software folder that was created in your profile folder. If your Pinoy_Software folder is not there, you can simply follow the instructions above to create it. After you open the folder, you will need to right click on it and select "Pin to Pinoy_Software" and then select your Pinoy_Software folder. Related Searches Pelikula
