What's New in the Corel DVD Copy?

Video DVD Copy is a versatile video DVD burner, with which you can burn video files in various formats on a DVD-R/RW disc, burn a DVD folder, create a movie DVD or burn video files to a DVD-RW disc (for step-by-step instructions, see the chapter "Creating video DVDs"). As you may know, it is quite simple to create a simple video DVD, like a slideshow or a music video. However, when it comes to designing professional-quality DVDs, there is not much software available out there that is easy to use for free, but offers great result quality. Well, you have found the right software! Video DVD Copy is such a program that has a number of features, which makes it a really great tool for creating professional-quality video DVDs. Of course, it is not a top-level DVD burner, but it does have some nice tools. One of these tools is Burn Set Up Wizard. The wizard is a tool which creates a DVD in only a few clicks. You can set all required settings like resolution, aspect ratio, playback mode, etc. from there. Also, you can quickly create a master DVD disc from a set of video files. In fact, you can either import a folder of video files to burn on one DVD, or automatically create a DVD folder from a directory tree. Of course, the interface is really simple and intuitive, so it can be used by everyone, even by casual users. And if you want to play a DVD with a disc player, you can add a movie DVD to the disc and name it something like "My DVD from Video DVD Copy". So, you need to read the license agreement carefully in order to be sure that you can use the software legally. This license agreement states, amongst other things, that you can copy a movie DVD for your own purpose, but you can't distribute it without the permission of the author (the publisher). You can also burn several copies of a DVD disc, which may be necessary when you share it with friends. Another feature that we like is the fact that you can create video DVD, which will contain subtitles in multiple languages. In fact, you can add up to three files which contain languages in the program's menu and the interface. So, you can create a DVD, which can be played both in English and French. Additionally, you can add video files from the Internet by using the built-in browser. It will also support most popular
