"The game's AI is also significantly enhanced, giving the players and teams an edge in aerial challenges," says David Rutter, FIFA executive producer. "Players and teams that improve their tackling techniques improve their decision-making and tactics, resulting in more successful duels and increasing their chance of scoring." Here are some other highlights of FIFA 22. Free Kick Creator In FIFA 21, the Free Kick Creator provided the ability to get on the end of a free kick to score a goal. In FIFA 22, this feature is now smarter, allowing players to place their shot on goal

---

quickly. Players will now receive different types of feedback depending on their skill and timing, providing the right level of advice and instructions for the player to confidently place their shot on goal.

### Simulated Body Variations FIFA 22

introduces the Simulated Body Variations technology. Although it has been used in EA Sports FIFA titles for many years, Simulated Body Variations is never applied to match-specific player attributes, leaving the gameplay an extremely realistic experience. Simulated Body Variations works by focusing on small areas of player simulation, allowing individual body parts

---

or specific players to be modified in an authentic and realistic way. When a player is heavily injured, Simulated Body Variations can also simulate additional impacts from one player to another – for example, if a player is hurt, you could see him get up and fight for the ball despite his broken leg.

**New Goalscoring Mechanics**

One of the most important features of FIFA 22 is the introduction of Goalkeeper Jumping – meaning goalkeepers can jump up and over the ball. This allows the goalkeeper to use their feet more easily to defend a ball in mid-air, while simultaneously helping to create an

---

advantage for the defender that's in possession. Players can also perform an Early Jump, which allows them to receive a slight degree of acceleration from a normal low-speed jump, and thereby gaining a slight advantage against opponents.

Referee When initiating a challenge, the referee's attention will be drawn to the player who loses possession, and they will now follow this player's movement during the challenge. Additionally, referees can now show the technique used by each player when making a tackle, meaning they'll understand exactly what kind of foul was committed. Refereeing situations are

---

now displayed on the pause screen,  
meaning they're more visible to players in-  
game. Rest
