Use your best move to score. With "Nomad Vision," your most brilliant moment will be brought to life to drive the attacking play and win games. You'll be able to pull off your best dribble through an army of defenders and guide it exactly where you want it to go. You'll be able to perform your most dynamic skills with real-life player movement, and use aerials and close-range strikes to win games. Ever-evolving off-ball movement thanks to "New Player Reactions." This year, off-ball moments are fully reactive to the actions you take, creating more plays. The new ball physics also means you'll be able to bend the ball into any tight spaces, change direction in mid-air, and continue spinning just as if it were attached to you. Counterattack to overwhelm your opponent. With "New Roles." Real-life player roles return. Each player will have a unique physical attribute and style that can be used in unique ways. Whether you're a forward or a central defender, good positioning and awareness will be essential. Your new strength and speed will offer you the edge in tight spaces - attack through traffic and counterattack to secure goals. Ball mastery at every skill level. New Player Controls. With more players and the return of real-life player movement, controls will be tighter to ensure players are on-point and perfect their skills. You'll be able to dominate smaller and slower opponents and create more chances for your teammates. Reworked corner kick controls will let you take the best advantage of spaces and get the ball through the first touch. Improved set pieces will make everything from corners and free kicks to penalties a dead ball.
