[Patient safety. A new paradigm for building organizations]. A new paradigm for building organizations is to take patient safety as a goal and a strategic imperative. This approach is likely to include a new vision of organizational structure, leadership, measurement, rewards and programs; for example, existing quality and safety management systems need to be built on new principles that are more patient-centered. Until these building blocks are in place, efforts to improve patient safety must be seen as a means to an end, not as an end in itself. 2/11/2007 Habacuc is a possible god of the Aramaeans, that's very important to me. How about you? (Habacuc or his daughter Esther, take your own pick) Here is how Habacuc appears in my brain. He is an "old Assyrian god of the sea", that's how Wikipedia explains him, which is a good description. He had 70 teeth, just like Hadad (I think I've mentioned this before, I don't really remember). He had a beard. He was the lord of Aram, a region in the middle east, near the Euphrates. He was also the god of the moon. And he was the judge of the dead. I could make this a metaphor for the judge in the Lord of the Rings, but I won't. Habacuc was the judge of the dead, I think, but I'm not sure, that would be awesome. Kiss him! And ask for his many, many teeth. This is the second time today I've had a dream where I've seen
