I would like to convert the entire application. I tried that by first translating the source code to javascript using the as3js.org tool and then compiling the js as a swf file. The js swf file works fine but the game doesn't work. It gives the error "Parser could not parse ActionScript file error". I'm not sure how to correct this. Is there anyway in which I can convert the actionscript directly to javascript and then convert the js file to swf? P.S : If I keep the entire Actionscript source file as it is and just translate the main class, it gives a more or less the same error. A: Well, it sounds like your main class is no longer the main class in AS3. From the error it appears as if your main class is not ActionScript based, rather a "kind of" HTML based.
