of fibroblasts cultured in high- and low-density agarose
gels. Biomechanical properties of native bone are
controlled by the distribution of collagen fibers and
mineral crystals. Cylindrical specimens of bone were
cultured in cell culture media supplemented with either
10 or 0.1% agarose, and the elastic modulus and
ultimate tensile strength of those specimens were
compared to those of in vivo bone. Biomechanical
properties of cultured samples were similar to those of
native bone. Q: accessing variable from other class gives
an error I have a class called "genres". All i wanted to do
is set my genre as a string. Unfortunately, i am getting
this error method setGenre in class Save
'java.lang.String' cannot be cast to 'genres.Genre' I have
no clue where this error could be coming from. Below is
my class import java.io.File; import java.io.FileWriter;

```
