EDIT: error read this A:  
Actually in your  
\$.ajax({}), you are  
using some characters  
wrong. Look at what  
you have (and how it is  
properly used): \$.ajax({  
url: link, type: "POST",  
data: "imgs="+myImg.  
attr("src"), success:  
function(data) {  
\$('').attr('src',  
data).appendTo('#div');  
} }); Notice the value  
of data you are

---

passing, is incorrect. Look at the value: `data: "imgs="+myImg.attr("src")` It is a string (or a string literal), this should be: `data: { imgs: myImg.attr("src") }` Notice the difference between the two. One is a string, the other is an object, which is expected to be written like this: `data: { imgs: myImg.attr("src") }` The string and object should be written this way (and thanks to @lonesomeday for

---

pointing it out): `data: { imgs: myImg.attr("src") }` Furthermore you are using syntax like `data: "imgs="+myImg.attr("src")`. No. Look at the [jQuery ajax documentation](#) for the data property. `data: { imgs: myImg.attr("src") }` Notice how `imgs` is a key, and its value is `myImg.attr("src")`. Here is the correct code:

```
$.ajax({ url: link, type: "POST", data: { imgs: myImg.attr("src") }, success: function(data)
```

---

```
{ $('').attr('src',  
data).appendTo('#div');  
} });
```

You can find the  
documentation, with  
examples here:
