Lotus One Shot Kit WAV

one of the only things i did find to be lacking in the lotus is its very minimal camera compartment. we decided to test it out at the chautauqua zoo, and went on a hike around the zoo. we also brought along our video equipment for the hike, so this was a test trip. of course, we could have just stuck to our normal hiking routine, and i can tell you from experience, as i took the lotus on quite a few hiking trips, that the camera compartment was only filled with the essentials, and a body harness. this is not a bad thing, but it did take a little bit of planning and prep for getting gear and sd cards into the lotus. i never liked the idea of putting a camera strap across the middle of my chest. i find it hard to breathe, and besides the fact that it is uncomfortable, i am always worried it will rip and cause my dslr to fall out. in the case of the lotus, the camera strap is placed in a compartment on the front of the bag. this compartment is completely hidden when you are carrying the bag, and it allows for plenty of room to carry your camera strap without worrying about it hitting the ground. also, the camera strap is adjustable, so you can fix it to your liking. the shimmering texture of the jazzy keyboard lines and the top-notch samples in the lotus one shot kit give each track a unique, atmospheric feel, and lend a darkly contemplative mood. just add your favorite sub and kick and youre ready to create some fresh and exciting hip-hop beats! the lotus one shot kit for kontakt contains 3 mini construction kits with 13 construction kits in total. for each mini kit, weve provided two patches, one for the ideal mix, and one for the ideal delay settings to allow you to explore different levels of processing. and weve provided 5 multi-sampled instruments: bass, synth bass, synth lead, synth lead 2, and synth pad. 5ec8ef588b
