## ACalendar Calendar Tasks V2.2.3 Final Paid APK [Latest]

I've updated my pure calendar widget to 2.1.3. since the update, the calendar widget won't work anymore. all that i get is that it's disconnected. however, on the widget itself, it says calendar is valid ok, the problem is now that i upgraded to pure calendar 2.1.3 and it's not working properly. its not that it's disconnected, it's not that it doesn't show the calendar. it just doesn't show any calendar at all, even with my google calendar and standard calendar. ok. now, it worked fine for me until the update, and i have removed the app, and re-installed it. it seems to be working fine. however, when i removed the app, and reactivated it, it stopped showing the calendar, despite having a full calendar sync. i need to

---

uninstall and re-install it and re-sync. ok, i've reached the 'most frustrating' point with this widget. i've done the update and it still doesn't work. i've disabled all previous add-ons and re-added them. i've turned off notifications. i've tried starting it on desktop and switching wifi to mobile. i've tried on several phones with the same result. what am i overlooking? it's pretty infuriating. i've gone back to the previous version. i've upgraded purecalendar to 2.1.3 and i've switched back to my htc evo. the calendar widget works fine on my galaxy s3. but my htc evo only shows one calendar in the widget. so one calendar from google and the other from to do list. hopefully i just missed something simple but i cannot find it. i did an update to to do list and my refresh time is now past 14 hours. it always seems to do this. is there a way to force the refresh? it needs to be updated. i can't find the option to force my calendars.
