look no, this isnt an early beta its just a normal version of heroes of might and magic 3. as you can see in the video the game runs very well even on the atari 2600. some people might say "oh this must be a fake" but it comes directly from the publisher which might mean its legit. they just delayed the game a bit. ive played it a bit and it runs very well. it is possible to play the game in normal graphics and its like playing a super cracked version of heroes of might and magic 3. however, you should not try to run the "reloaded" game on v4. it causes problems with the mouse. however, its fun to play all the way up to the last battle. here i've made a series of of short videos that demonstrate "how to hack the game." its a simple 2 - step process. 1 - download the game and extract the files. 2 - edit a few specific settings via the cheat engine settings file. it is important to note that the game uses many mandatory restrictions to prevent modding (cheating) in the game. for example, there are constant checks for the cheat engine files and are updated on a regular basis. check out this link for more info: <http://blog.cheatengine.org/2012/05/01/hacx-0-1-a-free-hacked-legacy-game-hack-tool-cheat-engine/> maplestory is the king of mmorpqs in terms of quality. the graphics, music and achievements are just some of the things that set it apart from the rest. sadly, in terms of getting hacked with equipment it has a very high skill cap (albeit not 100% true). there is a great

deal of work and creativity necessary to create the best equipment so the proof is in the pudding. ive been trying to hack maplestory for a while now, but i keep running into the same bug. in the description you could find a link to an alternative solution. it works great and almost anyone with maplestory experience could use it. i would like to share my hack with the world. the only one thing i ask is that the fakes stay away from the fakes.
