## Si Te Vjedhim Nje Password Facebook

use strong passwords: long, random, difficult to guess passwords. if you use password managers, you can use the same password for all of your accounts. if you dont use a password manager, try to use a different password for every site you use. you can use password generators to make random and strong passwords. im a huge fan of xkcd and ponyos which is a password manager built in to a browser extension. i like it because i can use any website i visit, and i can generate random, strong passwords which are easy to remember. if you use firefox, chrome or safari youll get an extension for that. if you use chrome, safari or opera then youll get the random password generator which you can use to generate a random, strong password for every site you use. if you want to take your password manager up a notch, add facebook-recovery to it. its a really cool way to help you recover your facebook account if you ever lose your password. if you think you might have, then get it installed and let it run a few times (recovery). once it notices that youve lost your password, it will make a new one for you. alternatively, you can use facebook-recovery which has the advantage of being open-source. install it, and it will sit in your system tray and will automatically notify you when your account has been compromised. most of the users are being experiencing the situation that the facebook has been disabled due to some reason and they are not able to login the game. the reason is that facebook has changed some features which is causing the game to crash. the game can be again started when the new version 1.1.2 will be available. for that, we need to update the game. 5ec8ef588b
