Before you go out and purchase an expensive camera, make sure that you know what it is, what it costs, and what you're getting in terms of quality, functionality, and accessories. If you are experienced with a non-digital camera, then eventually you'll work out what the different features are that you need. If you have been involved with video editing software for some time, then it is likely that you have seen photos you took that you would love to have cropped or whizzed up with a new background.
