Given the convergence of productivity software that allows you to manage and collaborate on your content, I find it hard to imagine a future that doesn't include the tools you see here. Adobe's new subscription model has led to a wider adoption of the programs as well, and that is a boon for Adobe (and users). The other programs I recommend here are free (and are available for free as stand-alone apps. You can easily download and install the apps from your software download site). Among the other tools and services are Adobe Muse, Adobe Stock, free Flash Pro, Lightroom Classic, and Adobe XD, Adobe Cloud Select, an update to the cloud-based mobile photo editing app Lightroom Mobile. To utilize scripts and filters and effects for Photoshop, in the bottom tab, you can see the Editor latest script available. Depending upon the script, just click the script and have the script applied to any selected image. In every version, Adobe Photoshop upgraded a lot of new features like merging layers, wand tool, selections brush, pencils and levels. More than 14 Million of people around the world use Photoshop. You can create anything you want by using this software.

The other big software publisher, Microsoft, recently made an offer to purchase Adobe for \$20 billion in cash. If the acquisition is approved, the two companies will join forces to produce all of their consumer software -- including their flagship office-suite productivity software and publishing platform. It would also bring together two major players in the struggling home-video market: Microsoft dominates the studios with films like *Avatar* and *Titanic*, and its standard-definition DVD solution for the home has historically trailed in performance. The big downside is Microsoft must purchase a company that already has its core skills refined and proven, and which is being challenged and improving at a furious rate. On the other hand, Microsoft presumably could enhance the product with its vast resources and vast product development team, which could speed up the annual development process for a company that aims to push to the forefront of new technology.
