Swing Users, we now have a new Java Application. You are free to download and use Archive Grinder, if you like it. You're also free to point your friends to this site if they have Java-based software, web sites, blogs, etc. Archive Grinder is the product of a team of programmers who have used and abused the Java development tools and environments, and hence hate them. Here's a special announcement: After weeks of research and development we have finally developed a solution to get rid of the jarfile sizes from the JDK. We would like to present you with Archive Grinder, a program created specifically for you to remove some jarfiles from your Java programs, while keeping the program functionality. We have been a work in progress, and we are looking for feedback. We have already moved from Java 1.3.1 to Java 1.4.1, and we are aiming to remove the JAR files from Java 1.5. Besides the official JAR-size-shrinker, we are looking for other possible solutions and alternatives for our grinder. If you have a better idea of how to do this, send us a mail. Download FAQ What is the tool for? The tool can remove dead code from existing JAR files. A JAR file typically contains a lot of unused code, which most Java compilers try to optimize away, causing your JAR file to be larger than necessary. What is the result? A smaller JAR file, suitable for mobile devices. Can the result of Archive Grinder be used in production applications? Yes. The result can be directly used as a new project or placed into an existing project and made to live. Is it legal? We believe in the "you know best" philosophy. What we do is not illegal. And yes, we're trying to protect your rights. Is the source code available? Yes, but not released. Can you give me a discount for using your software? We would like to. We are not interested in providing "free" stuff, but we can give a discount. Security Notice This site was created to help you easily compress the .jar files of your projects, and we believe in the "you know best" philosophy, so, we don't offer any guarantees or warranty.
