The "Express 2021" version of the app is better suited for a beginner. You can create new layers, adjust contrast, brightness, exposure, and color from scratch and with the new app you can have 14 editable tools at a glance. The PS2021 also leverages the iPhone XS to provide even more control with the Natural Interface; one of the new additions is the erasing tool. Not only does it erase a specific area of the image, but also when you press the eraser again, it removes the previous areas. It's perfect for when you want to adjust a section of a picture without editing a large portion. It also provides a way for novice users to get the best out of the iPad. Licensing issues aside, one of the most impressive new features of Photoshop 2.20 is the pen. As with many others, the first thing new users do is copy and paste content. As more and more powerful features become available, it is easy to get caught in a trap of thinking, "Is this too much?" The new UI is smart enough to warn you when you get into trouble. For example, if you start a selection by drawing a line on a picture, the app's "pencil" tool becomes active and a line is placed automatically. Don't use automatic modes; learn from them. The "Magic Wand" represents the first time a difference has been made in the past 10 years. It's smarter than before. You can now choose to select an area of the picture which may be difficult to select manually. It's not often you get a review with a definitive, "yeah, way better" verdict. This is one of them. The new Paper White 4K printer is way better than any color inkjet in paper quality, colour accuracy, resolution, and balance. Amazing! And the scanner was something I printed on, so the colour accuracy is rock-solid too. I bought the 1-4in pack just for the scanner. It's good for all your home photo printing and scanning needs. Additionally, you can communicate with your printer - on the on-screen display, via the USB port. I'll use it to print greeting cards as well. It's better than the HP Officejet

**The Levels tool:** This tool is capable of adjusting the overall intensity of an image. It works very similarly to the Tint tool, but levels versus tints.

Level 1 is the lightest, Level 4 is the darkest. Adjusting the levels in an image will lighten dark areas, and lower the black point, or bring lightness to the darkest areas. **Other tools:** Beyond the basic editing tools, you can create patterns and patterns with the Intent tool. This tool lets you choose or create a pattern, and then apply it to an area of your image. The Lasso tool is perfect for drawing shapes over your image. You can even draw with this tool for a perfectly clean circle or square (the shape of the tool). Lasso is great for carefully selecting a color area, or for removing an unwanted area.
