Click here to Download. • Trade Prince Surprises with 'Under' Tattoo at 2 a.m. Back in the beginning of January, I got two very exciting gifts from my secret Santa - a million dollar bill and a cute drawing of a pug in a "diamond/surprise" print by a local artist. The latter got me thinking - I'm a pug owner, and I'm also getting ready to paint my ears, so I thought I'd try and recruit my santa to do this for me, and I'm glad I did! I'll update you as soon as it's done, but I'd like to thank my Santa, because she did an amazing job - I can hardly wait for my ears to be done so I can show them to you guys!Q: Implementing autocomplete with a nested relationship using liquibase I have a class that has a nested relationship with another class. I don't want to use a foreign key column on the main class, I want to use the foreign key of the other class as the primary key of the main class in liquibase. I tried to configure the relationship this way: classToMain: references: idBase: idOfOtherClass Other class: idBase: id When I try to run a liquibase update I get the error: ERROR liquibase.changelog.impl.ExecutableChangelog - Error executing: /home/acp/sandbox/conf/changelog/schema/changeSet/c1.xml, /home/acp/sandbox/conf/changelog/liquibase.properties, /home/acp/sandbox/conf/changelog/changeLog.xml:23: liquibase.exception.ConfigurationException: table "classToMain" has no column name:idBase I read around and tried this answer, but I'm not using foreign keys on the parent class so I'm not sure it is the same. Is there a way to tell
