Not only from YouTube but also you can download video from .Pentagon, Committee of 300 and Global Government: The Real Agenda Americans are awakening. It's at the local, state and federal level and in their own hearts. As people begin to see the dangers in their own local communities and their government, they are beginning to turn to those who know about these evils and see the dangers. Also, many of them read the New York Times daily. What is expected in the mainstream media these days is to report on the "good" things that are happening. Everything is such a mystery. The world is a mystery and so is the future. How could everything that is happening be known? Everyone can read minds! How could there be such deep understanding and commitment to education? But what is happening is simple. This century is the time for the Architects and the Cabal to bring in the Global Government - They have planned this for over 2,000 years. It is the plan for the one-world government as well as the eternal war between good and evil. Only those who are awake and aware can see this agenda. The Illuminati bloodline families are descendants of those who were members of the Council of Foreign Relations since the early 20th Century. They are the ones who have run the world as the top families for over 200 years now. One of the boys in the Soprano's - Vincent "Chin" Gigante - was born in 1916. He is also a bloodline member of the same families that is still involved in all of these events. The birth dates of many of these families go back to the 1600's. The crisis of the Obama era, the end of the Emergency and the coming realignment between good and evil has left the Elite in chaos. Our country is being systematically dismantled. The Emergency is over. But the real war between good and evil, those who serve us and those who serve the elite, the next 6 years or more, is like some form of a religious war. The global elite don't want us to know about the ultimate endgame. They want us to be ignorant and live in a virtual reality world of perception
